

INSTRUCTIONS FOR #733

For more details or assistance, go to WWW.FLIPWORKS.COM

Tools Required: #2 Phillips screwdriver

Kit Includes:

1 Tray

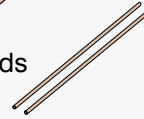

1 Back Support

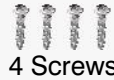

4 Tape Pads

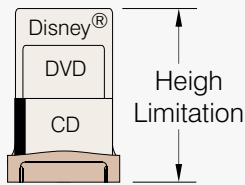

2 Rods

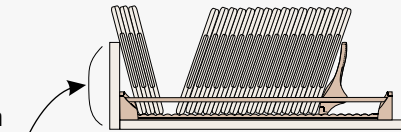

4 Screws

Special Considerations This robust tray is designed for specific applications. Certain features may limit your use.

Stores tall media standing up

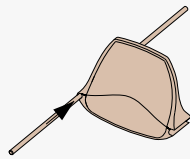

Requires a front (when mounted on a pull-out wood shelf)

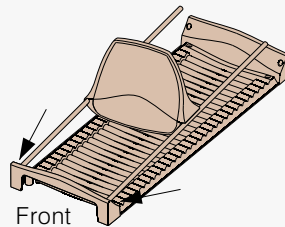

Screw may pass through thin drawer bottoms (Consider using 2-sided adhesive squares).

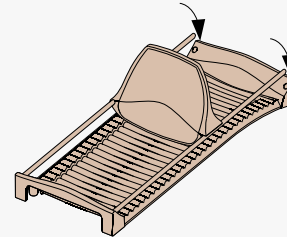

Step 1 Assemble tray

Insert rod

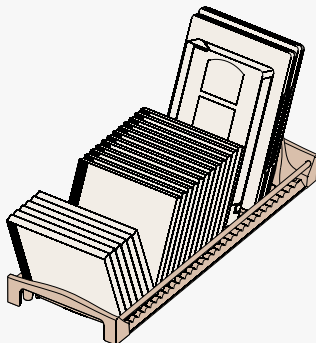

Slide rods into the front holes

Flex the tray and install rod into the rear holes

Step 2 Install a few pieces of your tallest items (CD's or DVD's). Place in your application and verify that you have enough height, width and depth.

Step 3 Install screws or use 2-sided adhesive squares when installing on thin drawer bottoms.
